

Changelog — NOC For Other Examination Extension

All changes to this extension are documented here in reverse chronological order.

v4.1 — June 2026 (Current)

New feature: Stage 1C — Post-performa vigilance routing

- Added Stage 1C to handle the workflow state where the assistant (DIVYA KORNU / MADHU DHAKA / VISHALI MARWAHA) has completed the performa attachment and the request returns to AMIT KUMAR SINGH as Pending Review + N/A.
- **Trigger:** Last Reviewed = assistant, next = AMIT KUMAR SINGH (Pending Review, N/A), **AND** ABHIMANYU SWAMI has **NOT** yet reviewed (no entry in action history), **AND** Office = RO CHANDIGARH.
- **Action:** Sends the request to ABHIMANYU SWAMI (empNo: 276695) for vigilance clearance with the same remark as Stage 1.
- **Key guard:** The `isAbhimanyuInHistory()` helper scans all action history entries to ensure ABHIMANYU SWAMI has not already reviewed. This prevents false positives when an assistant raises an objection during Stage 2 (admin clearance), where ABHIMANYU SWAMI's entry already exists.
- **Priority order updated:** Stage 3 → Stage 3B → Stage 3C → Stage 2 → **Stage 1C** → Stage 1B → Stage 1.
- `content_add_reviewer.js` requires no changes — Stage 1C uses the same `sessionStorage` pattern as Stage 1 (select by emp number, not by name).

Files changed: `content.js`

v3 — May 2026 (Current)

Bug fix: Office name whitespace normalisation

- Fixed a critical bug where the extension failed to route Stage 2 requests for offices like “DO CHANDIGARH” because the portal stores office names with double spaces (e.g. “DO CHANDIGARH”) which did not match the single-spaced entries in the office lists.
- Applied `.trim().replace(/\s+/g, ' ')` normalisation at all four office comparison points: `isRoChandigarh` check, `cadre/office` read in `decideAssistant()`, and both DIVYA and VISHALI office list comparisons.
- This fix also future-proofs against tabs or non-breaking spaces in office names.

Files changed: `content.js`

v2 — May 2026

Safety: Request type guard added to all three scripts

- Added Request ID prefix check (NOE) at the entry point of all three content scripts.
- Extension now stays completely silent on any request type other than NOC For Other Examination, even if those pages share the same URL pattern.

- `content_noc_list.js`: reads Request ID from table row before clicking Review; aborts if not NOE.
- `content.js`: `getRequestId()` function scans page elements and body text; activation only proceeds on confirmed NOE prefix.
- `content_add_reviewer.js`: body text search for NOE prefix at the very start; returns immediately if not found.

Files changed: `content_noc_list.js`, `content.js`, `content_add_reviewer.js`

New feature: Stage 3

- Added Stage 3 detection: triggers when the last Reviewed entry is one of the three assistants (MADHU DHAKA / DIVYA KORNU / VISHALI MARWAHA), the next entry is AMIT KUMAR SINGH with Pending Review + N/A remark, and the assistant's remark contains the key sentence confirming the request is in order.
- Action: fills the Reviewer Remarks box directly on the Review Page without navigating to Add Reviewer.
- Two remark variants: one for RO CHANDIGARH requests, one for all other offices.
- Stage priority order is now: Stage 3 → Stage 2 → Stage 1B → Stage 1 → No action.

Files changed: `content.js`

v1 — May 2026

Initial working version

- `content_noc_list.js`: auto-opens the first Pending Review request on the NOC For Other Examination listing page.
- `content.js`: reads action history, detects Stage 1 (send to ABHIMANYU SWAMI for vigilance clearance), Stage 1B (RO CHANDIGARH variant — send to relevant assistant with performance remark), and Stage 2 (send to assistant for admin clearance based on Cadre and Office routing table).
- `content_add_reviewer.js`: fills Office Type, Office, Employee, and Reason on the Add Reviewer page using `sessionStorage` handoff from `content.js`.
- Safety features: trigger flag, no auto-submission, no-match = no action, highlight before acting.
- Assistant routing: MADHU DHAKA (General cadre), DIVYA KORNU (Depot + Group 1 offices), VISHALI MARWAHA (Depot + Group 2 offices).

Files added: all four files (`manifest.json`, `content_noc_list.js`, `content.js`, `content_add_reviewer.js`)
